Providing new insight on the intellectual and cultural dimensions of the Cold War, Michael Latham reveals how social science theory helped shape American foreign policy during the Kennedy administration. He shows how, in the midst of America's protracted struggle to contain communism in the developing world, the concept of global modernization moved beyond its beginnings in academia to become a motivating ideology behind policy decisions.*

by Michael E. Latham. (4) \$8.79. After World War II, a powerful conviction took hold among American intellectuals and policymakers: that the United States could profoundly accelerate and ultimately direct the development of the decolonizing world, serving as a modernizing force around the globe. By accelerating economic growth, promoting agricultural expansion, and encouraging the rise of enlightened elites, they hoped to link development with security, preventing revolutions and rapidly ...
