In order to construct the country ' s pyramid, students must first calculate the percentage of the population of each sex in each age group. Example: According to the Worksheet, the total population of the United States in 2017 was 326,625,791. The population of U.S. males aged 0-4 was 10,310,369. $10,310,369 \div 326,625,791 = .032$ or 3.2%
